

Overview

This industry standard 1000 x 1200 mm quality wooden platform is ideal for the transport of goods in many industries including Fast Moving Consumer Goods, Beverage, Produce, Hardware, and Automotive industries.

Its 4-way entry design offers greater efficiencies during transport and storage.

Features and Benefits

True 4-way entry ensures compatibility with all standard pallet jacks and forklifts.
Provides better efficiency in pallet loading and unloading.
Payload rating of 1300 kg.
Nominal Load Capacity- Block stacked up to 5 unit loads high.
Operational efficiency optimization
Suitable for automated production and warehousing facilities.
Made from pine wood with heat treatments; no chemical treatment used.
Distinctive blue paint allows rapid identification
As an additional benefit, CHEP has a positive impact on the environment, all CHEP pallets are 100% recyclable

Specifications

Dimensions - in millimeters

	Length	Width	Height
External	1200	1000	145

Configuration and Stacking

Block stacked up to 5 unit loads high
Truck Load Quantity 550

Notes

Materials

Pine wood with heat treatment. Color Blue.

Performance and Standards

Carries 1300 kgs under normal conditions with a uniformly distributed load.
