The Retail Display Pallet is a smaller footprint pallet for use in a retail store for merchandising.

As a one touch solution, this takes products direct from manufacturer to retailer.

The superior design delivers larger forklift tyne entry points and enhanced beam racking capability, increasing operational and storage efficiencies.

Its footprint can optimise transport efficiencies – the footprint of 6 Retail Display Pallets is equivalent to 2 CHEP Australian Wooden Pallets.

Features and Benefits

Engineered to fit the majority of materials handling equipment used in supply chains with wider forklift tyne entry points and ability to beam rack

Improved stock density per square metre reduces replenishment costs and improves on-shelf availability

Improved promotional efficiency by moving displays fully stocked

Non-porous surface protects goods from contamination

Reduces risk of product damage through one touch movement

Anti-slip technology on the deck and forklift tyne entries to reduce OH&S risks

The Retail Display Pallet is compatible with CHEP’s Multi Purpose Beverage Trays, Retail Beverage Trays and the Reusable Plastic Containers (RPCs) range

Configuration and Stacking

Maximum number of stacked layers when loaded in a warehouse is 2

Maximum number of stacked layers when empty in a warehouse is 16

Temperature Range

| Minimum / Maximum | -10 °C / 50 °C |

Should be used in operating temperatures between -10 and 50 degrees Celsius

Notes

Materials

Injection Moulded Polypropylene

Specifications

Specifications are subject to variation and may be changed without notice. The platform shown here represents the latest developments. For some platforms, earlier versions are sometimes supplied when the latest are not available.
