

Overview

Pallet collars and lids easily convert a pallet into a stackable container.

The use of the collars and lid protect the unit load from dust, light and potential of theft.

The collars can be stacked to be adaptable to the height of your product.

Features and Benefits

Complete Flexibility

The CHEP network of service centres enables the convenient hire and dehire of Collars and Lids on an as-required basis, with no stipulation on minimum quantity or period of hire.
CHEP collars and lids are used in conjunction with the ISO 1000 x 1200 4-way entry pallet.
Used as an alternative to expensive, disposable packaging.
Provides greater flexibility in handling, storing and transporting a wide variety of goods.
CHEP equipment provides the most cost effective and capital-free method to meet distribution requirements.

Innovative Design

The security separator lids divide and secure the collared pallet load to prevent crushing of fragile products.

Consistent Specification

Increases operational efficiency.
Manufactured from waterproof plywood to strict specifications.
Robust, yet lightweight with no compromise on quality.

Environmentally Friendly

Upon return to CHEP every collar and lid is inspected and repaired if necessary to ensure that only top quality Collars are available for use.
CHEP collars and lids minimize - or totally eliminate disposable packaging.

Painted CHEP Blue

Distinctive blue paint means CHEP equipment can be easily identified.
