

Pooled Wood Stringer Pallet

Canada (48 x 40 inches)

Overview

This industry standard quality wooden platform is ideal for the transport of goods in many industries including Fast Moving Consumer Goods, Beverage, Produce, Hardware, and Automotive industries.

Features and Benefits

Innovative Design

Provides greater efficiency in pallet loading and unloading
Partial 4-way entry allows access to forklift trucks from all four sides, pallet jacks from the 40" side and only low-profile pallet trucks from the 48" side

Consistent Specification

Increases operational efficiency
Suitable for automated production and warehousing facilities

Consistent Availability

Ensures no delay in production at times of seasonal or unexpected demand

Environmentally Sound

Made from 100% reuseable or recycled materials

Specifications

Dimensions - in millimeters

	Length	Width	Height
External	1220	1016	143.002

Configuration and Stacking

81% Top Deck , 53% Bottom Deck coverage
(9) top deck boards
(5) Bottom deck boards
(3) Stringers
Block stacked up to 5 unit loads high

Notes

Materials

Wood: quality timber from a controlled selection of different wood types, primarily mixed hardwood
Paint: water based
Nails: either standard or stiff stock wire

Handling

Maximise the use of the pallet surface
Minimise lifting from the undersides of the skids

Performance and Standards

A general purpose pallet that can be safely used for most applications. The CHEP stringer pallet has been designed using the Pallet Design System to carry 2,800 lbs in normal operating circumstances with a uniformly distributed load

Truck Load Quantity

570 pallets
