

Overview

CHEP Containers are not just a better way to transport automotive parts. They are part of a complete packaging solution that can reduce costs at every stage in the supply chain. From management to warehousing, distribution and sequencing, to inventory management and in-plant logistics, CHEP's returnable packaging solution offers improvements in automotive supply chain efficiency and performance. All automotive containers are made from durable, recyclable plastic and are stackable. The totes are designed to be hand held and generally feature smooth interior walls to provide maximum strength, secure stacking and product protection. CHEP Automotive containers offer maximum cube usage and come clean and ready for use to save storage and wash costs. CHEP containers are accepted by most automotive manufacturers and suppliers.

Features and Benefits

- Ensure a secure fit and stable carrying platform with the ability to interlock to create a standard unit load per container type
- No need for re-packing and staging – modular design with several container sizes enables a variety of parts to be delivered directly to the line side
- Reduce product damage with impact resistant material and reinforced external ribbing for maximum strength and secure stacking
- Suitable for automated production and line side racking through consistent specifications
- Reduce environmental impact and remove waste material from the supply chain with fully recyclable materials
- Easily identify container contents with high visibility industry standard label holders
- Enhance handling efficiencies with ergonomic hand grips for improved comfort and safety

Specifications

Dimensions - in millimeters			
	Length	Width	Height
External	304.8	381	241.3
Internal	246.38	337.82	223.52
Nominal Capacity and Weight			
Maximum capacity	18,406 ltrs 0.02 m3		
Maximum load weight	22.68 kgs		
Tare Weight	1.41 kgs		
Configuration and Stacking			
Stacked layers			12
Stacked layers in transit when open			5
