

## Overview

The IcoQube™ is a first-class platform solution for intercontinental transport. It comes in 4 foldable sizes specifically designed to increase utilisation of sea container capacity, therefore increasing component volume delivery and saving transport costs.

The IcoQube™ helps to protect the environment by reducing the number of shipments resulting in reduced carbon emissions.

The IcoQube™ helps you achieve greater supply chain efficiencies.

## Features and Benefits

- Achieve greater transport and storage efficiencies with 4-way entry design
- Reduce transport costs with containers available in 4 sizes and all designed to increase utilisation of sea container capacity
- Decrease OH&S risk to the labour force – all containers are made from strong and lightweight material, including corflute walls and plastic lid / base
- Reduce storage costs with a best-in-class foldable ratio of 5.3:1
- Reduce physical waste and disposal costs compared to 1-way packaging – all containers are moisture resistant, reusable and environmentally friendly
- Increase product protection during transport with dual latching lids
- Easily identify contents with label placard on all 4 sides of the sleeve
- Ensure greater stability with all components interlocking

## Specifications

### Dimensions - in millimeters

	Length	Width	Height
External	975	770	746
Internal	937	733	557

### Nominal Capacity and Weight

Maximum capacity	380 ltrs
Maximum load weight	250 kgs
Tare Weight	17.3 kgs

### Configuration and Stacking

Maximum stacked layers when in transit is 3  
 Maximum stacked layers for storage is 4  
 40 Foot high cube sea container can hold 108 units when loaded, and 720 units when empty  
 Return Ratio: 5.3:1

## Notes

### Materials

High Density Polyethylene

### Specifications

Specifications are subject to variation and may be changed without notice. The platform shown here represents the latest developments. For some platforms, earlier versions are sometimes supplied when the latest are not available.
