# What if every supply chain was more efficient?

## The opportunity

Sustainability and cost savings are no longer mutually exclusive.

They go hand in hand.

We'll collaborate with you, look at every aspect and movement in your supply chain to find ways to reduce its impact on the environment. We can show you how sustainability – doing what's right for our planet – is also right for your business.

Reducing our impact on the environment is everyone's job. And for more than 60 years, it has been a job we've taken seriously. Sustainability is at the core of our values and our business model.

We believe in a circular economy in which we strive to do our best for the environment. Where goods are designed to be long lasting, easy to repair and reuse.

With this drive to protect our planet, our global experience and our unique position at the core of thousands of supply chains, we can make all aspects of your supply chain more efficient.

We can help ensure that your supply chain meets your sustainability goals and your business goals. So you can do what's right for your company and what's right for all of us.

## What we do

For 60 years we've helped more companies move more goods, to more places, more efficiently and more sustainably than anyone else.

And we can help you do the same. It's time to move more with less.

We'll look at your entire supply chain and then determine how we can help you handle and transport your products at a lower cost to your business and with minimal impact to the environment. We'll help you eliminate the cost of empty miles, reduce the amount of product that ends up in landfill, and reduce the number of trips and containers needed to transport your goods. Because we have the broadest and most environmentally-friendly range of platforms, we can also help you determine where you can use eco-friendly platforms at a lower cost to your business.

We will provide the experience and expertise needed to help get your sustainability initiatives adopted throughout your organisation. Working as partners, we can make a difference to your business. Making it more sustainable, with less cost.

# How we'll work together

Our experienced and dedicated supply-chain experts, equipped with industry best-practice training, tools and methodologies, will work in partnership with you. They'll analyse your current operations and identify opportunities to help advance sustainability at every turn in your business.

## How you'll benefit

Of course, this isn't only about protecting the planet. Our environmental solutions have already helped companies large and small across the globe improve their bottom line.

We can help you:

- + Determine how to handle and transport your product at a lower cost to your business and with less impact on the environment
- + Find the right balance of environmentally-friendly solutions
- + Provide you with simple, foldable, stackable plastic containers, allowing for up to 25% more full loading utilisation (compared to drums) and helping to reduce road emissions
- + Eliminate empty miles through collaborative freight
- + Minimise distances travelled through network optimisation
- + Utilise multimodal (rail, sea and road) solutions
- + Ship more product per lane by optimising trailer cubes and unit loads
- + Develop and use more environmentally-friendly primary, secondary and transit packaging
- + Reduce food waste and damaged product or materials sent to landfill
- + Determine your current environmental savings from using our platforms

# Only CHEP

## Move more with less

We work with many of the world's premier supply chains. And in our partnerships, we've learned the best ways to make supply chains sustainable. No one in the market offers more sustainable platforms and solutions, helping to make your company more environmentally friendly. But we're not just a service, we're a partner. We will collaborate with you, investigating the unique demands of your situation and your supply chain, so we can help you make a real difference.

By working with our customers,  
we have helped to save...

Landfill waste reduced by at least  
**1.38 million tonnes**

Food waste reduced by at least  
**3,920 tonnes**

CO<sub>2</sub> equivalent emissions reduced by  
**2.3 million tonnes**

Transport distance reduced by at least  
**35 million km**

Water consumption reduced by  
**12.2 million m<sup>3</sup>**

# Better Business. Better Planet.

## Better communities

At CHEP, we know that our Corporate Social Responsibility (CSR) goes beyond that of environmental sustainability. It's about being a responsible member of both our planet and our communities. It's more than social responsibility – it's creating a strong driver of business and supplier diversity. About driving for Zero Harm with workforce safety. About maximising community involvement and supporting those in need. And we can help you do the same.

We've developed our Brambles Code of Conduct to provide an ethical and legal framework, to ensure that all of our employees adhere to our Corporate Social Responsibility, Environmental, Health and Safety, Diversity, Supplier, Anti-bribery and Corruption policies.

We believe that we can't make a difference by working alone. That's why we've established strong alliances to help us do more.

## United Nations

In 2015, the United Nations created their goals for sustainable development, '17 Goals to Transform Our World'. We've been working tirelessly to make sure we complete as many of the applicable goals as we can in our company and our business practices.

## Ellen MacArthur Foundation

The Ellen MacArthur Foundation's Circular Economy 100 was established to bring corporates, governments, academic institutions, emerging innovators and affiliates together to enable organisations across the world to realise their own circular economy ambitions faster.

We are an active member of the foundation, constantly striving to improve the circular economy.

## Dow Jones

Brambles, our parent company, is listed on the Dow Jones Sustainability Asia-Pacific Index and the Dow Jones Australia Index. These indices are highly-respected benchmarks for investors who integrate sustainability considerations into their portfolios. In 2016, Brambles was ranked second in our industry category (Industrial & Commercial Services), highlighting our commitments to sustainable practices across our business.

## EcoVadis

EcoVadis is an independent rating agency which specialises in sustainable development and performance monitoring, using methodologies developed in accordance with the Global Reporting Initiative and the United Nations Global Compact. In 2017, CHEP Europe was ranked in the top 1% of all suppliers assessed, earning an EcoVadis Gold Recognition Level for the second year in a row.

### FTSE4Good

Brambles is a proud constituent of the FTSE4Good Index series. This index is designed to facilitate investment in businesses that meet globally-recognised corporate responsibility standards, including stringent environmental, social and governance criteria.

### Enactus

Enactus is an international, non-profit organisation dedicated to inspiring students to improve the world through entrepreneurial action. An annual series of regional and national competitions showcases the impact of the students' projects, and the National Champion teams advance to the Enactus World Cup. At CHEP, we provide support for Enactus initiatives throughout the year, including forums and presentations, home-country sponsorship, judging and the World Cup.

### FEBA

We partner with the European Federation of Food Banks, who are working painstakingly with charities across Europe to take care of people in need. We offer financial support for the creation and development of food banks, as well as enabling the use of CHEP pallets and IFCO RPCs in the Federation's operations. We engage with customers across the supply chain to help them collaborate with food banks more effectively – helping to deliver millions of meals to almost 6 million disadvantaged people in Europe.

### Brambles Sustainability Framework

As a company, we've built our business model around our love for the planet. Because of our unique position at the core of so many supply chains, we've gained expertise helping companies make the most of their efforts to reduce their environmental impact. It's all part of CHEP's Better Planet initiative. We have only one planet. So we're working to take care of it.

**Better Business.**  
**Better Planet.**

**We are CHEP.**

**We've helped more companies  
move more goods, to more places,  
more efficiently and more sustainably  
than anyone else in the world.**

**We use our scale, network and  
knowledge to help you share and  
reuse resources, redefining the  
way the supply chain works.**

**So you can move more with less.**

**More efficiency. Less risk.  
More sharing. Less cost.  
More simplicity. Less complexity.  
More sustainability. Less waste.**

**Because finding new ways to make  
the world's supply chains more efficient  
isn't just better for your business.  
It's better for our planet.**
