CHEP connects people to life’s essentials, everyday. We help move more goods, to more people, in more places, than any other organization on Earth. How do we do it? We’ve built an extensive logistic network with the largest supply of shared and reusable pallets and containers in the world. Companies rent our platforms through a circular business model called pooling. This circular model defines not just how we do things, but who we are as a company. Our more than 110 million pooled platforms in North America can be rented on demand or stored on site and allow companies to keep goods safe in transport, increase sustainability, produce less waste, and improve their bottom line through every leg of the supply chain.

**Supply Chain Benefits:**

+ Decrease capital expenditures and eliminate the burden of pallet ownership and maintenance.
+ Rent only the pallets you need, when you need them for better inventory management.
+ Simplify operations as CHEP handles pallet retrieval and quality assurance so you don’t have to.
+ Reduce product damage, improve handling efficiencies and increase safety.
+ Benefit from a network of more than 530 CHEP service centers throughout North America to ensure pallet consistency and speedy customer support.

**Sustainability Benefits:**

+ Utilize an inherently sustainable circular business model.
+ Benefit from 99.7% of CHEP pallet wood coming from certified lumber sources.
+ Use CHEP operational sustainability assessments to lower your carbon footprint and eradicate empty transport miles.
+ Reduce packaging and product waste.
+ Share your sustainability value based on credible, science-based metrics.
CHEP Platform Solutions

CHEP pallets and containers are known for the unique and innovative characteristics that set them apart from just any other platform. Whether you’re using our standard pooled wood block pallet (48x40"), CarbonNeutral® pooled half pallet (40x24") or Pallecon 315 container, each brings specialized engineering, best-in-class durability and exceptional performance to your supply chain.

CHEP pooled block pallet features:
+ True 4-way entry design
+ Payload rating of 2,800 lbs
+ Free span racking in either direction
+ Evenly distributes load to reduce product damage
+ Suited for automated production due to spec consistency

CHEP pooled CarbonNeutral® half pallet features:
+ True 4-way entry design
+ Payload rating of 1,200 lbs
+ Suitable for in-store display, retail-ready packaging and small orders
+ Reduces handling for easy store fulfillment
+ 100% CarbonNeutral®

CHEP Pallecon 315 container features:
+ Ideal for sauces, condiments, dressings, dairy blends, beverage bases and flavoring, and non-hazardous liquid chemicals
+ Holds 315 gallons and safely stacks 12 high collapsed, 5 high open in storage
+ Reusable, collapsible features minimize transportation and disposal
+ Smooth interior and exterior walls reduce harborage points and improve hygiene

Meeting Consumer Demand in a Smart and Sustainable Way

Our mission is to help customers build smarter, more sustainable supply chains. Using our network visibility and the power of our logistics platform, we work together with manufacturers and retailers to solve shared challenges by eliminating waste, eradicating empty miles and cutting out inefficiencies. To accelerate that, we launched the Zero Waste World program, a new working collaboration for leading companies committed to creating smarter, more sustainable supply chains. A few of the key CHEP resources include:

+ Digital solutions for asset tracking and customer goods visibility powered by BXB Digital.
+ ISTA-certified packaging performance testing, e-commerce testing and unit load optimization at the CHEP Innovation Center and Test Track, the only facility of its kind in the world.
+ Ideation sessions and site assessments from CHEP experts to to identify and implement initiatives, reducing costs and improving efficiencies.
+ Reusable transit packaging solutions for raw materials, ingredients and bulk finished goods.
+ Solutions for transport collaboration, order optimization, store fulfillment, on-site services, storage programs and more.
