

Getting more from every unit load.

This is the Supply Change.™

The opportunity:

More product. Less damage.

More efficiency. Less waste.

More speed. Less resources.

More impact in-store. Less impact on the environment.

When you work with CHEP, you'll find we have what it takes to make all that happen for your supply chain and your business.

You'll have the sustainable platforms, the quality, the supply and the access to our broad array of solutions as well as our pragmatic, roll-up-your-sleeves know-how and global experience.

Everything you need to get more from your unit loads. To move them. Store them. Handle them. Display them. Profit from them. Throughout your network and at the point of sale.

Everything you need for a better supply chain. One in which you make more money on every unit load. One in which you better serve the world.

A more efficient, profitable and sustainable unit load.

Together, we can make it happen.

Profit and Planet is no longer a compromise.

What we do:

Since we were founded more than 60 years ago, we've helped more companies move more goods, to more places, more efficiently and more sustainably than anyone else in the world.

We do it by enabling supply chains to share and reuse our platforms.

When our customers share and reuse platforms with others, the use of higher quality platforms becomes financially feasible. Higher quality platforms minimise worker safety risks, improve automated systems, reduce product damage, increase product quality and carry more product per load.

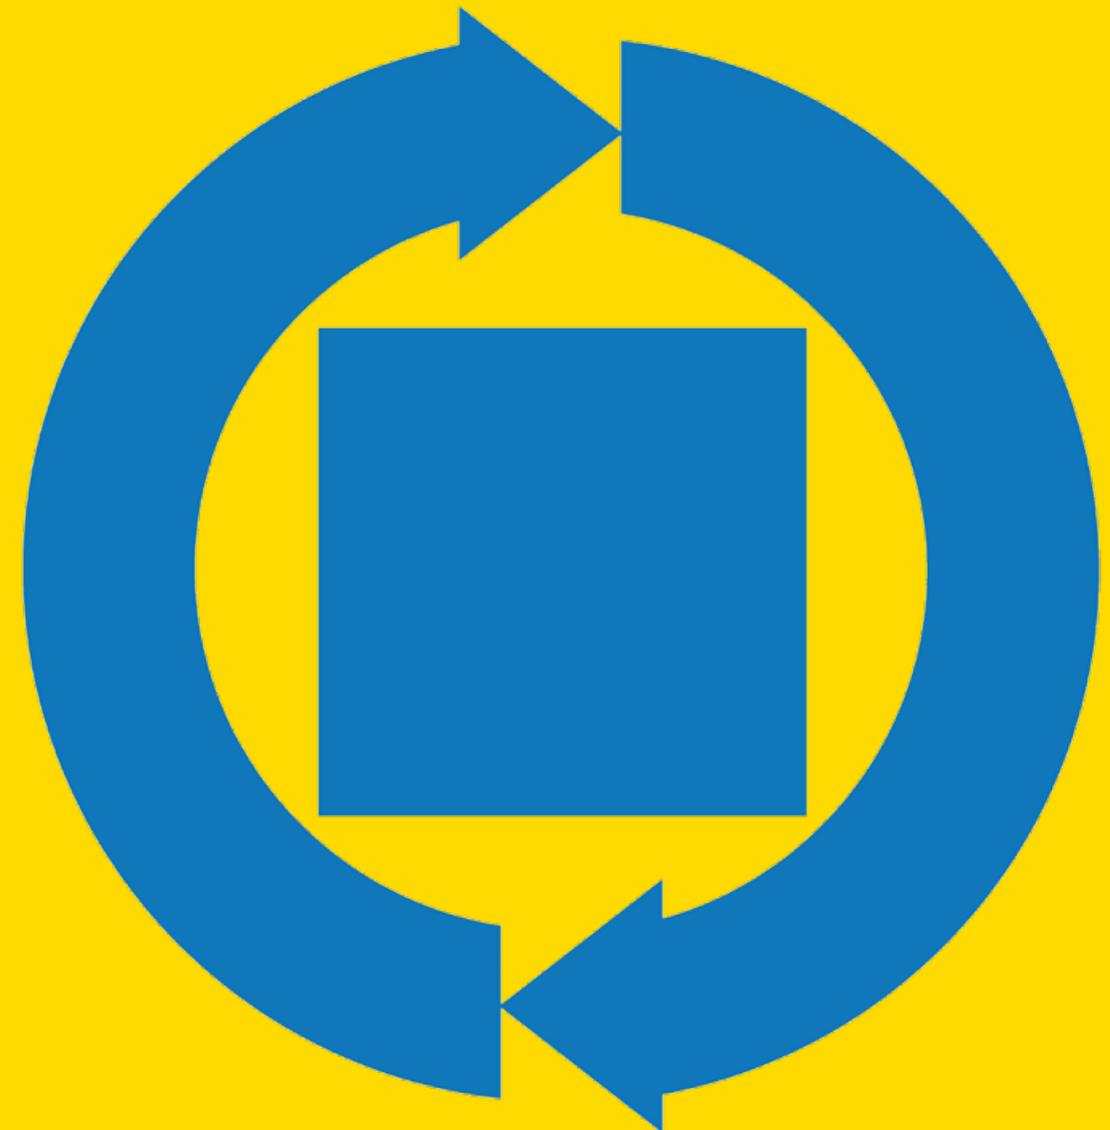

By sharing and reusing the same standardised platforms, all parties within the supply chain are enabled to standardise their operations, processes and equipment. This standardisation is the mother of supply chain efficiency.

Sharing and reusing platforms from our extensive inventory also enables our customers to reduce the number of platforms they need to procure, manage and maintain. Less capital is expended. Less resources are consumed.

When you outsource your platform operation to us, we handle just about everything for you. No longer will you need to invest your capital to own your own platforms—or your energy and human resources to procure, transport, administer, repair and maintain your proprietary platform pool.

Outsourcing your platform supply also eliminates your platform risks, by removing your exposure to market supply and price fluctuation and ensuring consistency of supply and quality.

Sharing and reusing CHEP platforms eliminates waste throughout supply chains and the world.

Pallets | RPCs | Containers

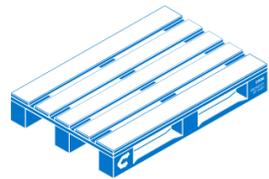

The industry's broadest array and greatest supply of sustainable platforms.

Standard Pallets

With nearly 250,000 customer locations across Europe, and millions of wooden and plastic pallets in our pools, we have the consistent quality and supply to help you best move your products. CHEP developed and continues to drive pallet standards that connect players across the supply chain to maximise efficiency and safety. We are best positioned to supply your needs, ensure your operations keep moving, and get your goods to the right place at the right time in the right condition.

Display Units

Fractional pallets and other display units help reduce handling costs and increase sales through improved store merchandising and replenishment. Our display units and other fractional pallets are designed to safely and efficiently take POS display units and product in bulk through the supply chain from the manufacturing floor to the shop floor. These solutions are designed to reach every location across the store, in every store format.

Standard Pallets

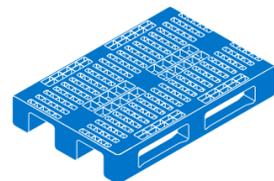

EU Half Pallets

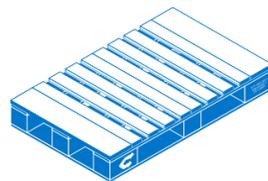

Quarter Pallets

Wheeled Quarter Pallets—Dollies

Plastic Pallets

Intercontinental Pallets

RPCs

Containers

Plastic Pallets

Our plastic pallets enable the safe transportation of packaging and ingredients so they can enter clean production areas without needing to repalletise. They help our customers comply with the hygiene requirements associated with food safety standards from bodies such as IFS and BRC, and with the GMP as defined by the World Health Organisation. Our plastic pallets are also manufactured with tight tolerances to make them suitable for automated handling systems.

RPCs

CHEP's sister company, IFCO, is the world leader in Reusable Plastic Containers. We manage over 165 million RPCs and offer a total of 24 different sizes globally. IFCO RPCs address packaging, product quality, transportation and handling requirements of many goods currently being transported via corrugated boxes and crates. IFCO RPCs are 100% recyclable and maintain hygiene standards in accordance with ISO. This makes them an ideal in-network or end-to-end store fulfillment solution for the modern sustainable supply chain.

Containers

Our containers offer a cost-effective and environmentally sustainable way for you to bring raw materials into your supply chain while protecting their integrity. These can include liquids, dry goods, chemicals and other bulk materials. With the widest range of containers in the industry, we can collaborate to find a platform that will work for you.

Intercontinental Pallets

Our shared and reusable Intercontinental pallets can help you ship goods across borders at the lowest cost. CHEP's heat treating complies with ISPM 15 in an environmentally friendly way, ensuring that our pallets meet standards for shipments around the world. We also offer supply chain solutions to manufacturers in over 60 countries. Through that experience, we've gained the expertise needed to counsel companies in Europe to improve their international supply chain performance and support their expansion into new markets.

Carbon Neutral Pallets

We already have the world's most sustainable platforms, but using our Carbon Neutral Pallets gives you the ability to do even more to help protect the environment. Our carbon offsetting program, offered through a partnership with global leader Natural Capital Partners, funds projects that reduce greenhouse gas emissions in places around the world where assistance is most needed.

How we'll work together:

As a company at the heart of more supply chains, we understand what makes them work. We know how to find inefficiencies. We know how to eliminate waste. We know how to overcome obstacles and make things work.

We've taken this knowledge and created a suite of supply chain solutions to help you integrate best practices from around the world. We will partner with you in whatever capacity your business requires. For most customers, it usually works like this:

First, we'll map your entire supply chain to identify the best type and mix of platforms to complement your unique business requirements.

Then, we'll work with you to implement platform management procedures and processes that increase efficiencies throughout your operations.

While we're putting these platform fundamentals in place, we'll discuss your supply chain goals, priorities, issues and opportunities to determine which of our supply chain solutions will bring you the greatest value.

Inbound and International Pallets

Our standardised platforms can help streamline the inbound shipments of raw materials from your suppliers. We'll work with you and your suppliers to find the right platforms for your operations, so you can minimise handling of non-standard platforms. Our shared inbound platforms can be used for your outbound deliveries to optimise their use. In addition, our international footprint and capabilities can help you eliminate many of the inefficiencies resulting from non-standard platform sizes around the world. We'll map your international flows to pinpoint inefficiencies and opportunities. With this understanding, we can customise solutions to help you export products and import materials using more sustainable platforms.

How you'll benefit:

The following will give you a good idea of the many ways our solutions can help improve your supply chain:

- + Select and implement the right platforms to safely and efficiently move your products through the supply chain
- + Reduce your supply chain's impact on the environment
- + Increase your in-store sales through improved merchandising and on-shelf availability
- + Increase the amount of product you ship per unit load and per truckload
- + Reduce product damage
- + Map and improve the flow of your goods, platforms and data throughout the supply chain
- + Enhance your platform inventory management processes
- + Improve your materials handling processes within your warehouses and production facilities
- + Increase the uptime of your automated and manual handling systems
- + Minimise empty lanes and trips within your transportation network
- + Enhance worker safety
- + Increase your returns on capital invested

The environmental benefits our customers achieve annually through the sharing and reuse of CHEP pallets, containers and RPCs:
1.38 million trees are saved for the planet.
630,000 tonnes of CO ₂ never enter the atmosphere.
3,000 tonnes less of food is damaged during transport.
420,000 tonnes of waste never make it to landfills.

Only CHEP:

CHEP is the global leader in shared pallet solutions. Our engineers and experts have been at the heart of thousands of supply chains—collaborating with customers to streamline operations. Our unmatched portfolio of supply chain solutions can help you optimise every aspect of your operation. We look forward to collaborating with you to help you get more out every unit load.

Global Good: For more than 60 years, CHEP has been a global leader in the sharing and reuse of resources to eliminate waste. Today in everything we do, we're focused on helping our customers develop and improve more efficient, safer and environmentally sustainable supply chains. It's all part of CHEP's Better Planet initiative, as we work to minimise the impact of the Supply Chain on the environment.

Our Consumer Goods Solutions help you execute the world's best practices.
