

Full-Size Pallet B4840A timber 48 x 40 inches

Description

This general-purpose, reusable wooden pallet is ideal for the loading, distribution and display of goods. It is serviced throughout CHEP's network of service centres, helping to increase efficiency and the sustainable use of natural resources across the supply chain. Ideal for exporting goods to North America and other markets that require the 40 x 48" pallet format.

Features and benefits

Robust block construction

- + Strength for the safe handling of heavy loads
- + Durability for consistent performance during handling, transport and pooling across the supply chain
- + Design eliminates notched stringers

Consistent quality

- + Dimensional accuracy makes it suitable for automated production, packaging and warehousing processes, minimising product damage and reducing downtime
- + Every pallet is carefully inspected and serviced to deliver improved conditions for health and safety

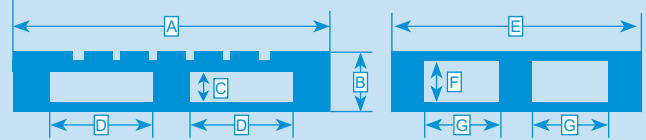

Colour coded blue

- + The distinctive CHEP blue colour ensures that our pallets can be easily identified

Warning: Rack the pallets under the outside blocks. For drive-in racking, support under the full length of the pallet is recommended – a minimum of 50mm – allowing the pallet to be positioned off-centre in the rack space. Preliminary testing is recommended on each automated or gravity pallet handling system due to the bespoke nature of each technical set up. CHEP does not recommend the use of this pallet in direct contact with unpacked foodstuffs.

Specifications

DIMENSIONS AND TOLERANCES* (inches)

Detail	A	B	C	D	E	F	G
Nominal	48.0	5.6	3.5	14.6	40.0	4.2	12.4
Minimum	47.8	5.4	3.4	14.4	39.8	4.1	12.2
Maximum	48.4	5.8	3.6	14.8	40.4	4.4	12.8

Materials** and compliance

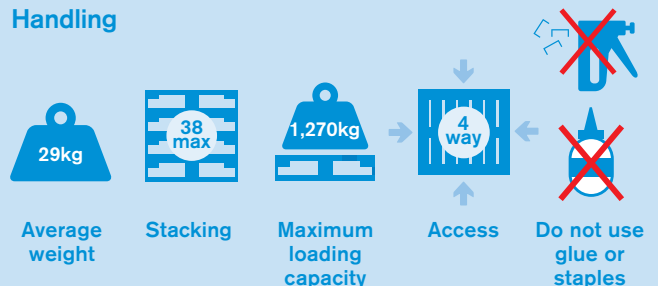

Wood: FSC- and PEFC-certified sustainable timber
Paint: blue water-based emulsion compliant with the highest standard EN-71-3

Nails: standard (carbon steel) wire; compliant with 94/62/EC for packaging and packaging waste content and concentrations of heavy metals

Inks: solvent-based inks used for pallet marking; compliant with 2004/42/EC Paints Directive and 1999/13/EC Solvents Directive

Handling

*For information purposes only, not a substitute for the pooled platform specification

**Applicable exclusively to platforms manufactured in Europe

Equipment compatibility

- + Can be used with all standard handling equipment
- + Four-way entry for easy access from multiple sides
- + Free span racking in either direction

Environmentally friendly

- + CHEP's pooling network reduces packaging waste and the overall impact on the environment

Important: CHEP pallets and containers always remain the property of CHEP and can never be legally bought or sold. CHEP reserves the right to change any of the above information without prior notice. To find out more, please visit www.chep.com
