

Overview

Flush non-reversible four way entry 1000 x 600 mm wooden pallet

Features and Benefits

- Improve handling flexibility and product security with four-way forklift access
- Ensure superior product protection with robust design features and durability under load
- Reduce supply chain costs – the Automotive Half Pallet is an industry standard and accepted by most European automotive manufacturers and suppliers
- Minimise environmental impact and remove waste material from the supply chain with fully recyclable materials

Specifications

Dimensions - in millimeters			
	Length	Width	Height
External	1000	600	144

Nominal Capacity and Weight	
Maximum load weight	500 kgs
Tare Weight	14 kgs

Configuration and Stacking

When empty, pallets can be stored 30 high on a level and solid base

Notes

- Materials**
- Timber:** Portuguese maritime pine or equivalent
 - Nails:** Mild steel
 - Paint:** Blue water based emulsion
- Handling**
- Automotive pallets should not be pulled or pushed along the ground
 - It is recommended that a 1000 x 1200 mm Automotive pallet acts as a 'slave' pallet in order to rack half pallet
 - The Automotive half pallet should never be lifted from underneath the base boards
 - Can be block stacked 4 high with up to 500 kgs on each pallet on a solid and level base
 - Should be lifted by a fork lift truck through the windows
 - Ensure that forks support the pallet without protruding
 - Forks should always enter the pallet squarely
- Performance and Standards**
- All automotive pallets are heat treated to ISPM15
