

Overview

The Stillage Double Pallet 'all purposes' stillage was originally designed and developed for the protective shipment of consolidated product.

Its internal plastic sheeting and robust construction helps protect the product from potential damage.

The Stillage Double Pallet has a wide application and is used in a variety of different market sectors.

Features and Benefits

- Robust construction and galvanised finish
- Four-way forklift entry
- Internal plastic sheets
- Strong lower skids and base
- Effective stacking system
- Collapsible to 450 mm
- 'Snap fit' and hinged door assembly
- Lockable doors at both ends
- Ensures product durability and reliability
- Easy access
- Protects product from potential damage
- More durability than using cages and open stillage
- Save valuable storage space and maximise transport efficiencies
- Provides efficient back loading (4:1 ratio)
- Allows one operator assembly and supports OH&S requirements
- Increases versatility and security

Specifications

Dimensions - in millimeters			
	Length	Width	Height
External	2250	1145	2020
Internal	2070	1065	1830
Folded	2250	1145	450

Nominal Capacity and Weight

Maximum capacity	4000 ltrs 4.00 m3
Maximum load weight	1000 kgs
Tare Weight	220 kgs

Configuration and Stacking

Stacked layers in transit when open	2
Stacked layers in transit when folded	10

Notes

Materials
Galvanised steel tubing and sheet with internal plastic sheeting
