

Overview

CHEP's Modular Containers are not just a better way to transport automotive parts. They are part of a complete packaging solution that can reduce costs at every stage in the supply chain.

From management to warehousing, distribution and sequencing, to inventory management and in-plant logistics, CHEP's returnable packaging solution offers improvements in automotive supply chain efficiency and performance.

All automotive crates are made from durable, recyclable plastic and are stackable. The totes are designed to be hand held and generally feature smooth interior walls to provide maximum strength, secure stacking and product protection. CHEP Automotive containers offer maximum cube usage and come clean and ready for use to save storage and wash costs.

CHEP containers are accepted by most automotive manufacturers and suppliers. In addition, the European totes are designed to German VDA (Verband der Automobilindustrie) specification.

Features and Benefits

- Ensure a secure fit and stable carrying platform with the ability to interlock to create a standard unit load per container type
- No need for re-packing and staging – modular design with several container sizes enables a variety of parts to be delivered directly to the line side
- Reduce product damage with impact resistant material and reinforced external ribbing for maximum strength and secure stacking
- Suitable for automated production and line side racking through consistent specifications
- Reduce environmental impact and remove waste material from the supply chain with fully recyclable materials
- Easily identify container contents with high visibility industry standard label holders
- Enhance handling efficiencies with ergonomic hand grips for improved comfort and safety

Specifications

Dimensions - in millimeters

	Length	Width	Height
External	594	396	348
Internal	370	370	343
Folded	594	396	61

Nominal Capacity and Weight

Maximum capacity	71 ltrs
Maximum load weight	18 kgs
Tare Weight	3.2 kgs

Configuration and Stacking

Stacked layers in transit when open	3
Stacked layers in transit when folded	30

Return ratio: 1:3.5

Notes

Materials

High Density Polypropylene (HDPE)

Recommended Use / Applications

Injectors, camshafts, fuel pumps, compressors

Options and Accessories

CHEP can design the insert to match customer packing requirement if needed
