

Overview

Features and Benefits

Durable Design

Reduces damage to product and packaging

Hygienic Platform

Eliminates splinters and nails
No moisture absorption
Easy to clean
Suitable for many goods, including packaged food and Beverages
Highly stable, UV resistant, highest quality plastics

Consistent Specification

Ideal for high speed automated systems
Constant weight and dimensions
Compatible with existing materials handling systems

Fully Recyclable

Materials can be easily separated for recycling
Reduces waste and benefits the environment

Specifications

Dimensions - in millimeters

	Length	Width	Height
External	1000	1200	200

Nominal Capacity and Weight

Maximum load weight	1250 kgs
Tare Weight	3.25 kgs

Temperature Range

Minimum / Maximum	-20 °C / 50 °C
-------------------	----------------

Notes

Materials

High quality HDPE

Handling

Can be used with all materials handling equipment designed for 1200 mm x 1000 mm perimeter pallets
