Overview

The Foldable Large Container (FLC) builds on the proven performance of existing bulk containers. It is specifically designed to reduce the cost of relocating empty containers while providing maximum product protection and load stability.

Features and Benefits

Ensure superior product protection with robust design features including ergonomic latches & handles, wear & damage resistant material and modular construction

Increases transport and storage space efficiency – containers are stackable when full or folded

Ability to access bulk parts line side through the use of the side access doors

Streamline line side processes with single person operation and the elimination of strapping and wrapping material

Improve handling flexibility and product security with four-way forklift access

Reduce time and effort for opening/closing access doors and collapsing containers with large ergonomic latches

Eliminate packaging waste and the associated time and cost with fully recyclable materials

Reduces costs along the entire supply chain using a single container from Tier Supplier to line side

Notes

Handling

Where layer pads, durable trays, etc. are to be automatically loaded in the FLC, they should be a maximum size of 44” x 41” to ensure unrestricted entry

FLC’s should be lifted by a forklift truck through the pallet base windows

The forks should reach completely into the pallet base and enter the FLC squarely

FLC’s should not be pulled or pushed along the ground.
