

Overview

The Foldable Large Container (FLC) builds on the proven performance of existing bulk containers. It is specifically designed to reduce the cost of relocating empty containers while providing maximum product protection and load stability.

Features and Benefits

- Ensure superior product protection with robust design features including ergonomic latches & handles, wear & damage resistant material and modular construction
- Increases transport and storage space efficiency – containers are stackable when full or folded
- Ability to access bulk parts line side through the use of the side access doors
- Streamline line side processes with single person operation and the elimination of strapping and wrapping material
- Improve handling flexibility and product security with four-way forklift access
- Reduce time and effort for opening/closing access doors and collapsing containers with large ergonomic latches
- Eliminate packaging waste and the associated time and cost with fully recyclable materials
- Reduces costs along the entire supply chain using a single container from Tier Supplier to line side

Specifications

Dimensions - in inch

	Length	Width	Height
External	32	30	34
Internal	29	27	27
Folded	32	30	13

Nominal Capacity and Weight

Maximum capacity	75.99 (UK) glns	12.20 ft3
Maximum load weight		1800 lbs
Tare Weight		85 lbs

Configuration and Stacking

Stacked layers for storage when folded	10
--	----

Maximum nesting when empty is 10 containers stacked together, maximum stack height is 101.5 inches.

Notes

Handling

- FLC's should be lifted by a fork lift truck through the pallet base windows
- The forks should reach completely into the pallet base and enter the FLC squarely
- FLC's should not be pulled or pushed along the ground
