Pooled Wood Block Pallet
North America (48 x 40 inches)

Overview

This industry standard quality wooden platform is ideal for the transport of goods in many industries including Fast Moving Consumer Goods, Beverage, Produce, Hardware and Automotive industries.

Its 4-way entry design offers greater efficiencies during transport and storage.

Features and Benefits

Innovative Design

- True 4-way entry ensures compatibility with all standard pallet jacks and forklifts
- Provides greater efficiency in pallet loading and unloading
- Free Span racking in either direction

Consistent Specification

- Suitable for automated production and warehousing facilities, increasing operational efficiency

Consistent Availability

- Ensures no delay in production at times of seasonal or unexpected demand

Robust Construction - Full Perimeter Base

- Provides strength for safe handling of heavy loads
- Evenly distributes load to reduce product damage
- Provides stability in block stacking
- Design eliminates notched stringers

Environmentally Sound

- Made from 100% reuseable or recycled materials

Configuration and Stacking

- Block stacked up to 5 unit loads high, not to exceed 10,000 lbs
- Empty pallets can be (stacked) stored 19 high in a trailer

Notes

Materials

- Wood: quality timber from a controlled selection of different wood types, primarily kiln-dried Southern Yellow Pine
- Paint: water based
- Nails: either standard or stiff stock wire

Handling

- Maximize the use of the pallet surface
- Minimize lifting from the undersides of the skids
- Rack the pallets under the outside blocks

Performance and Standards

A general purpose pallet that can be safely used for most applications in the distribution and transport chain. The CHEP Block Pallet has been designed using the Pallet Design System to carry 2,800 lbs in normal operating circumstances with a uniformly distributed load.

FM Approval applies to wood pallets that utilize composite wood blocks produced after December 30, 2008

Truck Load Quantity

- 570 pallets
